Clinical Associate Professor, Internal Medicine, Division of Geriatrics/Palliative Care

University of Arizona College of Medicine – Phoenix

Banner – University Medical Center Phoenix

Dr. Nimit Agarwal is an Associate Professor of Medicine at the University of Arizona. He is the inaugural director of the Division of Geriatric Medicine, the program director for the Geriatric Medicine fellowship and the current president of Arizona Geriatrics Society.

Dr. Agarwal is a clinician, educator, researcher, and innovator. Since finishing his fellowship in Geriatric Medicine at Loyola University Medical Center, in Maywood, IL he has been instrumental in the development of clinical and operational efficiencies in ambulatory and inpatient systems specially focused on older adults.

He has established innovative models of care by leveraging the capabilities of the Electronic Health Record to create smart protocols that can assist with identifying gaps in care related to delirium identification, mobility challenges and markers of increased complications during hospitalization of older adults at his organization. Under his leadership, Banner University Medical Center is proud to be a Geriatric Emergency Department and an Age Friendly Health Systems Care Excellence organization.

Dr. Agarwal is currently pursuing a Master's in Business Administration at the Eller College of Management with University of Arizona. His current work includes developing a patented AI software for the care of hospitalized adults. His goal is to enable organizations to incorporate geriatric medicine practice in all domains of care.
